

## Concussion Information Sheet

### What can happen if my student-athlete keeps on playing with a concussion or returns too soon?

Student-athletes with the signs and symptoms of concussions should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the student-athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after the concussion occurs, particularly if the student-athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage student-athletes will often under report symptoms of injuries. And concussions are no different. As a result, education of administrators, coaches, parents and student-athletes is the key for the student-athlete's safety.

### If you think your student-athlete has suffered a concussion

Any student-athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No student-athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance. Close observation of the student-athlete should continue for several hours. Rockbridge County Schools requires the consistent and uniform implementation of well-established "return to play" concussion guidelines that have been recommended for several years:

"A student-athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time" and "...may not return to play until the student-athlete is evaluated by a licensed health care provider trained in the evaluation and management of concussion and received written clearance to return to play from that health care provider, which will initiate the 'Gradual Return to Sports Participation Program'"

You should also inform your child's coach if you think that your child may have a concussion. Remember... it's better to miss one game than miss the whole season.

And... "when in doubt, the athlete sits out."
